

Sam H. Biggs

EXPERIENCE

BUSINESS INTELLIGENCE DEVELOPER

Goldman Sachs, Salt Lake City, UT, February 2017 - Present

Design, code, test, and aggregate results from queries to provide information to users and key stakeholders. Develop advanced ETL techniques and provide automated solutions for streamlined processing. Participate in the design, development, and analysis of data architecture and warehousing approaches. Design interactive data visuals and develop underlying infrastructure. Provide insight to build and automate workflows.

PRODUCT MANAGER

Goldman Sachs, Salt Lake City, UT, June 2014 - February 2017

Drove the product strategy to deliver laser sharp aesthetic changes and API updates to our tax platform. Gathered enhancement evidence from client experience data and IRS guidelines. Using Agile and Waterfall methods, I transformed our hard earned, data backed vision into shipped features.

QUALITY AND RISK DATA ANALYST

Iasis Healthcare, Salt Lake City, UT, July 2013 - July 2014

Performed epidemiological analysis on patient outcomes and surgical proceedings. Developed risk assessments and implemented quality enhancement programs targeted at specific populations. Drafted quality and risk recommendations based on my findings and delivered the results to internal stakeholders for review and implementation.

COMPLIANCE AND HR STRATEGIST

LineHaul National, Park City, UT, February 2011 - July 2013

I developed the companies HR policies, on-boarding process, and employee handbook. During my tenure we successfully on-boarded over 50 employees. I created a comprehensive compliance program which resulted in on-going licensure. Led the compliance department through several successful DOT and insurance audits.

DATA CONVERSION OPERATOR

US Forest Service, Ogden, UT, October 2009 - November 2010

Converted National Forest Library data into a new format which gave Forest Service employees the ability to search through a greater population of the USFS catalog with ease and accuracy.

LABORATORY TECHNICIAN

MTSI, Broken Arrow, OK, May 2006 - July 2008

Pulled pipeline fuel samples and tested content. Independently verified quality and reported metrics covering the entire testing suite. Testing included vapor analysis, distillation, litmus, and octane testing. Results were used to determine future processing and for purchase considerations.
