Sam H. Biggs

EXPERIENCE

PRODUCT MANAGER
Goldman Sachs, Salt Lake City, UT, June 2014 - Current
Defined the overall product strategy to deliver laser sharp aesthetic changes to our tax platform. Gathered enhancement evidence from client experience data and complex IRS guidelines. Successfully transformed our hard earned, data backed vision and wire frames into shipped features. The latest enhancements provided well received UX updates while also maintaining our products status as both regulatory compliant and industry leading.

QUALITY AND RISK ANALYST
Iasis Healthcare, Salt Lake City, UT, July 2013 - July 2014
Performed epidemiological analysis on patient outcomes and surgical proceedings. Developed risk assessments and implemented quality enhancement programs targeted at specific populations. Drafted quality and risk recommendations based on my findings and delivered the results to internal stakeholders for review and implementation.

COMPLIANCE AND HR STRATEGIST
LineHaul National, Park City, UT, February 2011 - July 2013
I developed the companies HR policies, on-boarding process, and employee handbook. During my tenure we successfully on-boarded over 50 employees. I created a comprehensive compliance program which resulted in on-going licensure. Led the compliance department through several successful DOT and insurance audits.

GROUP PLANS CONSULTANT
Team Nash, Salt Lake City, UT, November 2010 - February 2011
Delivered clients into the Utah Healthcare Exchange pilot program. I consulted with prospects, led presentations, and assisted firms with their implementation of the exchange roll-out. I drove the on-boarding process and was able to successfully convert several key customers on to the new platform.

DATA CONVERSION OPERATOR
US Forest Service, Ogden, UT, October 2009 - November 2010
Converted National Forest Library data into a new format which gave Forest Service employees the ability to search through a greater population of the USFS catalog with ease and accuracy.

LABORATORY TECHNICIAN
MTSI, Broken Arrow, OK, May 2006 - July 2008
Pulled pipeline fuel samples and tested content. Independently verified quality and reported metrics covering the entire testing suite. Testing included vapor analysis, distillation, litmus, and octane testing. Results were used to determine future processing and for purchase considerations.

PROJECTS

LATEST GITHUB COMMITS
My latest GitHub commits are for a task list. I used bootstrap, your own local storage, and angular to complete this app. It's simple, clean, and fully responsive.

You can find the project at http://lordharbar.github.io

EDUCATION

BACHELOR OF SCIENCE
Weber State University • Ogden, UT
